

PS/PSN Series

Rectangular, Standard Type Proximity Sensor

Various Sizes

Various Protection Circuits

IP67

Compact Size (PS08)

Response Frequency (PS08)

■ Features

[Common Features]

• Various Sizes Available For Diverse Applications

8×8 mm, 12×12 mm, 17×17 mm, 25×25 mm, 30×30 mm, 40×40 mm, 50×50 mm

• IP67 Protection Structure

IP67 protection structure allows stable and error-free operation even in wet or dusty environments.

[PSN17 Features]

• Operation Status Indicator (Red LED)

The vibrant LED operation indicators (red) allow users to quickly and easily identify operation status.

Rectangular, Standard Type

■ Features

[PS08 Features]

- **1 kHz Response Frequency**

1 kHz response frequency allows detection of fast moving targets.

- **Installation Using M3 Screw**

Easy installation with standard M3 screws

■ Application

Compact rectangular inductive proximity sensors PS08 series used for position control of cartesian coordinate robots (linear robots)

Rectangular, Standard Type Proximity Sensor

Line-up

■ Features

- Excellent noise immunity with specialized sensor IC
- Long life cycle, reliable performance, economical, and easy-to-install
- Operation indicator (red LED)
- Built-in surge protection circuit
- Built-in overcurrent protection circuit (DC types)
- Built-in reverse polarity protection circuit (DC 3-wire types)
- IP67 protection structure (IEC standard)

[PS08]

- Compact (8×8 mm) size allows easy installation in tight or limited spaces
- 1 kHz response frequency allows detection of fast moving targets
- Easy installation with standard M3 screws

[PSN17]

- Alternate frequency models allow adjacent installation of multiple sensors without interference

 Please read "Caution for your safety" in operation manual before using.

■ Specifications

• DC 2-wire type

※The existing PST17 is upgraded its function and design and changed as PSNT17.

※The case color of Normal Close type is changed from orange to gray.

| Model | | PSNT17-5DO PSNT17-5DC | PSNT17-5DOU PSNT17-5DCU |
|----------------------------------|---------------------|---|----------------------------|
| Sensing distance | | 5mm | |
| Hysteresis | | Max. 10% of sensing distance | |
| Standard sensing target | | 18×18×1mm (iron) | |
| Setting distance | | 0 to 3.5mm | |
| Power supply (operating voltage) | | 12-24VDC (10-30VDC) | |
| Leakage current | | Max. 0.6mA | |
| Response frequency※1 | | 700Hz | |
| Residual voltage | | Max. 3.5V | |
| Affection by Temp. | | Max. ±10% for sensing distance at ambient temperature 20°C | |
| Control output | | 2 to 100mA | |
| Insulation resistance | | Over 50MΩ (at 500VDC megger) | |
| Dielectric strength | | 1,500VAC 50/60Hz for 1 minute | |
| Vibration | | 1mm amplitude at frequency of 10 to 55Hz (for 1 min) in each X, Y, Z direction for 2 hours | |
| Shock | | 500m/s ² (approx. 50G) in each X, Y, Z direction for 3 times | |
| Indicator | | Operation indicator: Red LED | |
| Environ- ment | Ambient temperature | -25 to 70°C, storage: -30 to 80°C | |
| | Ambient humidity | 35 to 95%RH, storage: 35 to 95%RH | |
| Protection circuit | | Surge protection circuit, Over-current protection circuit | |
| Protection structure | | IP67 (IEC standard) | |
| Cable | | Ø4mm, 2-wire, 2m (AWG22, Core diameter: 0.08mm, Number of cores: 60, Insulator out diameter: Ø1.25mm) | |
| Approval | |  | |
| Unit weight | | Approx. 71g | |

※1: The response frequency is the average value. The standard sensing target is used and the width is set as 2 times of the standard sensing target, 1/2 of the sensing distance for the distance.

※Environment resistance is rated at no freezing or condensation.

Rectangular, Standard Type

● DC 3-wire type

● PS Series

※ The existing PST17 is upgraded its function and design and changed as PSN17.

PS/PSN Series

■ Control Output Diagram And Load Operation

◎ DC 3-wire type

◎ DC 2-wire type

◎ AC 2-wire type

■ Connections

◎ DC 3-wire type

※There is NPN/PNP selection switch in PA-12.

◎ DC 2-wire type

※The load can be connected to either wire.

◎ AC 2-wire type

※The load can be connected to either wire.

Rectangular, Standard Type

■ Proper Usage

◎ Differential frequency

When installing several proximity sensor closely, it may cause malfunction due to mutual interference. Therefore, please use differential frequency for the application
 ※Differential frequency type is only for 17 square.

◎ In case of the load current is small

● AC 2-wire type

110VAC: Min. 20kΩ 3W
 220VAC: Min. 39kΩ 10W

● DC 2-wire type

◎ Connection of the power supply

When using DC 2-wire and AC 2-wire type, a load must be connected before applying power; otherwise, components can be damaged.

It may cause return failure of load by residual voltage. If the load current is under 5mA, please make sure the residual voltage is less than the return voltage of the load by connecting a bleeder resistor in parallel with the load as shown in the diagram.

$$R \leq \frac{V_s}{I} (\text{k}\Omega) \quad P > \frac{V_s^2}{R} (\text{W})$$

[I: Action current of load, R: Bleeder resistance, P: Permissible power]

Please make the current on proximity sensor smaller than the return current of load by connecting a Bleeder resistor in parallel.

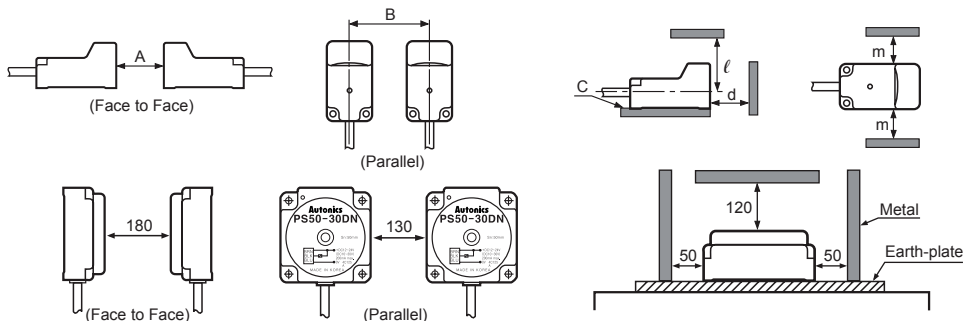

※W value of Bleeder resistor should be bigger for proper heat dissipation.

$$R \leq \frac{V_s}{I_o - I_{off}} (\text{k}\Omega) \quad P > \frac{V_s^2}{R} (\text{W})$$

[Vs: Power supply, I_o: Min. action current of proximity sensor
 I_{off}: Return current of load, P: Number of Bleeder resistance watt]

◎ Mutual-interference & Influence by surrounding metals

When several proximity sensors are mounted close to one another a malfunction of the may be caused due to mutual interference. Therefore, be sure to provide a minimum distance between the two sensors as below chart indicates.
