

- For reliable power supply of electronic devices in industrial applications
- Current overload and short circuit protection
- LED state indications of power and short-circuit, (according to the type)
- Safety requirements according to ČSN 332000-4-41
- Suited in polycarbonate enclosures
- High quality terminal box
- Mounting on DIN rail 35 mm

Stabilized power supplies are designed for reliable power supplying of sensors of non-electric values (level, flow rate, temperature, pressure) or as the sources for various circuits, indicators, converters, switch and control units etc. Power supplies fulfil the standards of electric safety and electromagnetic compatibility.

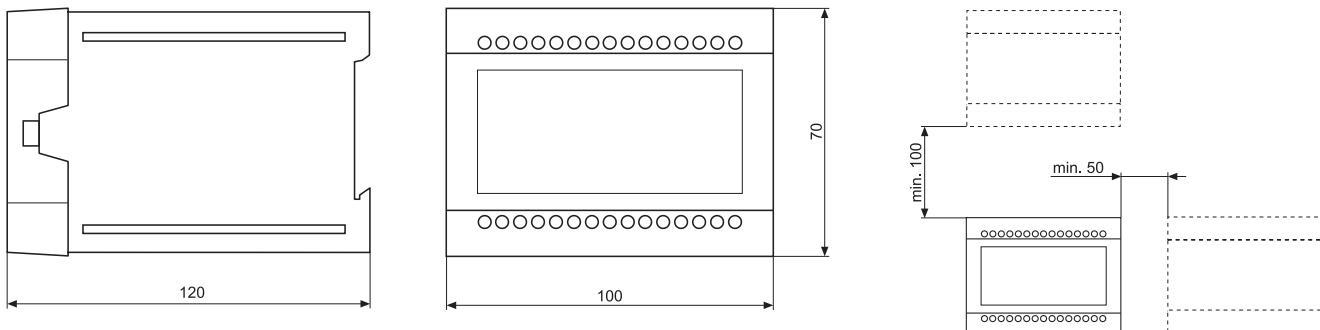

VARIANTS OF UNITS

- SPSU-1200-20 (A) **Universal stabilized power supply with load indication**, output voltage 12V DC, maximum load 2A. Electronic protection against short circuit and current overload on the output side, thermal fuse. Optical state, overload indication (LED) and load indication (LED bargraph).
- SPSU-2400-18 (A) **Universal stabilized power supply with load indication**, output voltage 24V DC, maximum load 1.8A. Electronic protection against short circuit and current overload on the output side, thermal fuse. Optical state, overload indication (LED) and load indication (LED bargraph).
- PSU-1200-S (C) **Miniature stabilized power supply**, output voltage 12V DC, maximum load 160 mA. Electronic protection against short circuit on the output side. Optical state indication (LED).
- PSU-2400-S (C) **Miniature stabilized power supply, output voltage 24V DC**, maximum load 80mA. Electronic protection against short circuit on the output side. Optical state indication (LED).

TECHNICAL SPECIFICATIONS

TECHNICAL SPECIFICATIONS				
		SPSU-1200-20	SPSU-2400-18	PSU-1200-S
Nominal supply voltage	230 V AC ($\pm 10\%$), 50 Hz			
Nominal power demand	60 VA		4 VA	
Output voltage	12 V DC	24 V DC	12 V DC	24 V DC
Output voltage tolerance	$\pm 2\%$	$\pm 2\%$	$\pm 10\%$	$\pm 10\%$
Output voltage ripple at $I_o = \text{Max.}$	max. 100 mV		80 mV	40 mV
Max. output current	2,0 A	1,8 A	160 mA	80 mA
Output short circuit current	max. 2,5 A	max. 2,5 A	max. 300 mA	max. 200 mA
Max. duration of output short-circuit	Unlimited			
Electric strength input – output	4 kV			
Ambient temperature	-20 ... +60 °C		-20 ... +50 °C	
Protection class of	Box Terminal	IP30 IP20		IP40 IP20
Material	Box Terminal	polycarbonate CuBe		
Conductor size	Recommended 0,5 ... 1 mm ² / max. 4 mm ²			
Internal protection on 230V side by fuse	T 500 mA		T 500 mA	
Reversible thermal fuse	130°C			
Weight	1,15 kg		0,15 kg	

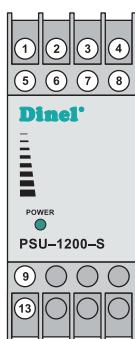

* For one channel

FUNCTION AND STATUS INDICATION

LED indicators	Colour	For the type	LED Function
"OVEROLAD"	Red	SPSU series	Shines – Short circuit or overload on the output terminal Dark – Correct function
"LOAD"	Yellow	SPSU series	Shines – Load indication on the output terminal (20, 40, 60, 80, 100%) Dark – Load on the output terminal is lower than 20%
"POWER"	Green	All types	Shines – Device connected to supply voltage, correct function Dark – Power loss or internal failure, short circuit on the output terminal or internal defect

SAFETY, PROTECTION AND COMPATIBILITY

All power supplies are equipped with protection against current overload and short circuit on the output terminal. Electrical equipment of protection class II.

Connection to the mains 230V only through a fuse or a circuit breaker

Safety requirements according to EN 61010-1.

Electromagnetic compatibility according to EN 55022 and EN 61000-4-2, -3, -4, -5, -6 -11.

PACKING, SHIPPING AND STORAGE

The device is supplied packaged in a cardboard box that protects it against mechanical damage.

When handling and during transport, it is necessary to prevent impacts and falls.

The electrical device must be stored in dry enclosed areas with humidity up to 85%, free of aggressive vapours at temperatures between -10°C and 50°C, and must be protected against the effects of weather.
